Health Information Management Technology: Are you up for a challenge?

The health care industry is one of the fastest growing in central Ohio. And some of the biggest advancements in health care are happening in information management.

Now, for the first time ever, our school is offering an exciting new program called Health Information Management Technology.

If you have an interest in technology and medicine – or if you are exploring new ideas for life after high school – this just might be the program you're looking for.

In partnership with OhioHealth, Ohio Department of Education and Columbus State Community College, this innovative new program will:

- Teach you about human anatomy and terminology, how to review health records for completeness and accuracy, how to make sure health information is coded and classified correctly, and many other aspects of health information management.
- Allow you to earn college credit through Columbus State Community College and work that leads to completion of Microsoft credentials.
- Provide a path leading to a Medical Coding Certificate as well as the option of continuing studies after high school to earn an associate degree in Health Information Management Technology.

A variety of jobs exist in Health Information Management Technology, and this program can help you build your future path to wherever your interests and talents can take you. There is no cost to enroll in the program.*

Contact your school guidance counselor to learn more about this exciting opportunity.

**nominal fees for software, lab and course work materials may apply*
