## Networking and Digital Technology: Are you up for a challenge?

Information technology is one of the fastest growing and most important industries in central Ohio. In fact, major employers can't find enough qualified and passionate IT professionals to fill their job openings. Students with a flare for computers, technology and programming are already well on their way to a successful career in information technology.

Sound like an opportunity? We think so too, and that's why we're offering Networking and Digital Technology – a chance to learn whether a career in IT might be right for you.

Working with Black Box Network Services and other local companies, this program combines classroom and work site experiences that will help you acquire the knowledge you'll need to start on the path toward an IT or business career. Through this program you'll learn about:

- Networks, telecommunications, wireless and mobility.
- Risk management, security and information assurance.
- Databases and applications.
- User and customer support.
- Digital media and visualization.
- Programming.

Networking and Digital Technology also will help you earn college credits while honing the IT skills necessary for such things as Cisco certification and programming/gaming.

A variety of exciting jobs exist in information technology, and Networking and Digital Technology can help you build your future path to wherever your interests and talents can take you. There is no cost to enroll in the program.\*

Contact Emily Greenwald at 614-487-5185 to learn more about this exciting opportunity.
